

FOR IMMEDIATE RELEASE

## **NODIS to Manufacture TruTint Smart Glass Film in Worthington, OH**

### ***Bringing Nanotechnology Innovation and High-Tech Jobs***

**Worthington, Ohio** – NODIS, a leading smart glass technology company, recently announced it is establishing a smart glass manufacturing line in Worthington, Ohio, as it ramps up production and sales of its TruTint smart glass technology to glass manufacturers globally.

NODIS smart glass film instantly switches window color, tint, and infrared heating, for comfort and sustainability, reducing building energy and greenhouse gas emissions by 50%. In electric vehicles, TruTint increases electric vehicle range by 35 miles. TruTint uses color coated nanoparticles that act as small light shutters that are oriented when voltage is applied.

NODIS does advanced materials research, development, and manufacture of its TruTint nanoparticle solution and the IOT-based control system that enables window control via smartphones and building management systems. Additionally, NODIS will begin production of its TruTint smart glass film in its newly established Worthington facility.

NODIS is investing heavily in Worthington by continuing to build its commercialization, systems engineering, and sales teams here in addition to its manufacturing facility, creating up to 25 high-tech manufacturing jobs and \$10M in production facility investment. .

“At NODIS, we are addressing climate change with our TruTint smart glass film and customers are responding,” said Mike Holt, NODIS Founder and - CEO. “With glass manufacturers planning to use TruTint in their glass products, NODIS is establishing its volume manufacturing capabilities. Worthington has been a supportive partner in our plans to hire a high

technology manufacturing team and establish a manufacturing capability in Worthington”.

“We are thrilled to welcome NODIS to Worthington, which will not only spur economic development, but also reinforces the community’s sustainability efforts by supporting the manufacturing of TruTint smart glass film,” says David McCorkle, Assistant City Manager for the City of Worthington.

### **About NODIS**

Founded in Singapore in 2015, NODIS’ TruTint smart glass technology is transforming windows, giving people the ability to change the tint, color, and temperature characteristics of windows instantly. NODIS provides glass companies with the technology to transform their glass into a smart glass with the only color, tint, and infrared switchable smart glass technology.
